MILLBROOK BED COMPANY

..... THE EXPERTS IN SLEEP

THE MILLBROOK BED COMPANY GROUP OVERVIEW

MILLBROOK BED COMPANY
..... THE EXPERTS IN SLEEP

WHERE OUR JOURNEY TO PERFECT SLEEP BEGAN

In 1946 when Walter Croll opened his small upholstery and bedding workshop in the Millbrook area of Southampton, majestic ships from such famous lines as Cunard, P&O and Union Castle sailed daily into Southampton Water.

The superb interiors of these vessels, which had made Britain's passenger fleet a byword for luxury and elegance, demanded the highest standard of workmanship.

The craftsmanship of Walter Croll's workshop soon began to win it a growing number of orders from discerning customers, and when the Union Castle Line awarded Millbrook a contract to refurnish and carpet their entire fleet, the success of the young company was assured.

Since that time Millbrook has continued to grow and prosper using the same key skills.

Our attention to quality and eye for detail has achieved us an enviable reputation around the world from luxury furniture and Contract Market Places both in Government and Corporate Sectors.

Whether we are building a luxury yacht interior or laying a floor, painting a vehicle or building the front door for the British Prime Minister at No.10 Downing Street our goal is to provide a competitive price, for the best quality, delivered on time.

Production, Quality and Performance Control
Logistics and 'Remote Location' control

ATTENTION TO DETAIL

An attention to quality and detail has given us an enviable global reputation from Luxury Furniture and Contract Market Places in Government and Corporate Sectors

Established in 1946, Millbrook is now a diversified Group with a turnover of £60+ million per year across different market places in the UK and around the world.

**WE'VE BEEN MAKING BEDS BY HAND
IN ENGLAND SINCE 1946**

Borne out of traditional craftsmanship, each Millbrook Bed is individually and lovingly handmade in England using the finest natural fabrics and fillings, such as Hampshire wool, cotton, cashgora, and silk.

From the nesting of individual pocketed springs, to the hand side-stitching of each mattress, every stage in the making of our beds meets exacting standards of timeless quality.

A good night's sleep is a vital part of a healthy life, promoting a well-being both physical and mental. And so it follows that a luxuriously comfortable, well-made mattress is more than a piece of furniture, it's an investment in your well-being.

Unlock the secret to perfect sleep in a beautifully created Millbrook Bed.

MILLBROOK BED COMPANY
..... THE EXPERTS IN SLEEP

THE NEW FOREST. HAMPSHIRE. ENGLAND. OUR HOME. OUR HERITAGE. OUR INSPIRATION.

LOOK FOR THE BLACK TUFT

All mattresses containing Hampshire wool from the black-faced sheep feature a single black tuft in the bottom right hand corner. This mark of quality tells the story that this mattress has been hand made using only British Hampshire wool.

ENGLISH FINE COTTON

All the cotton we use is grown sustainably in the USA and spun and processed in the only surviving commercial cotton mill in the United Kingdom. Today, the mill has been refurbished to create a state-of-the-art cotton spinning facility.

ENGLISH STEEL SPRINGS

Our springs are made from British steel by Leggett & Platt International Bedding Components, a worldwide leader in innerspring technology. Single or double layer pocket springs provide comfort with support, reducing partner disturbance and roll-together.

BRITISH WOOL

British wool is unique as it has natural crimp along its staple length. This acts like nature's own spring. The bounce, springiness and resilience is much sought after by manufacturers. Wool has improved thermal properties for a naturally more comfortable to sleep.

THE PERFECT FLEECE

Sheep from the Hampshire Downs can be recognised by their black face. Their wool is special as the milder climate means they produce a fleece that tends to be fuller and bulkier. Hampshire has been specially selected to make Millbrook mattresses.

THE SOLENT

Millbrook Beds is based on UK's south coast near Southampton. The Solent is major shipping lane separating the Isle of Wight and mainland England. Just two hours south of London, we border the New Forest National Park and the Isle of Wight Area of Outstanding Natural Beauty.

MILLBROOK BED COMPANY
THE EXPERTS IN SLEEP

OUR BEDS - THE RECIPE FOR PERFECT SLEEP

HAND SIDE STITCHING

Every Millbrook Beds mattress features traditional hand side stitching to secure the outer springs to the border preventing 'roll-off'. This is a highly skilled and labour intensive operation.

The difference this makes to the mattress is dramatic - preventing the distortion and extending the sleeping area right to the edge of the bed.

ATTENTION TO DETAIL

Our handmade mattresses and beds are designed in-house and use the finest materials and craftsmanship techniques for uninterrupted, perfect sleep. The details are so important that, even in an age of advanced automation, we still take care of them by hand.

NATURAL FABRICS AND FILLINGS

By using natural fillings, we create a mattress which is truly sumptuous and luxurious. We also use TENCEL™ branded fibres, which are not only sustainable but are also known for their softness and breathability.

CHEMICAL-FREE

Our complete range is chemical-free, offering 100% natural sleeping surfaces - no chemicals are used in the cotton covers or in any of the natural fillings of our mattresses.

ZONAL EDGE SPRINGING

Our unique zonal edge springing provides extra strength to the sides of the mattress, by applying two rows of firmer springs on either side, this ensures no 'roll-off' and helps reduce sleep disturbance.

INDIVIDUALLY NESTED POCKET SPRINGS

Pocket springs lie at the heart of our top-quality beds. Each spring is placed in its own individual pocket and joined all around isolating it from its neighbours, ensuring no 'roll-together'. Double stacking and individually nested pocket springs provide superior levels of support. The top tier of the springs absorbs the majority of the weight whilst conforming to the body shape.

MILLBROOK BED COMPANY

MILLBROOK MATERIALS

MILLBROOK BED COMPANY

THE EXPERTS IN SLEEP

OUR HEART LIES IN SUSTAINABLE SLEEP

Sleeping soundly requires peace of mind and if you are sleeping on a Millbrook Bed you can rest easy knowing that we have an environmentally responsible approach to the sourcing and sustainability of our raw materials.

Our fabrics and fillings come from sustainable sources, such as cotton grown in the USA and locally sourced wool.

Our environmentally-friendly approach means we use a fully biological solution to treat mattress tickings to meet flame retardant standards

Nine million plastic bottles are currently re-purposed each year for use in our mattress borders and headboards.

We only use wood and wood-based products from well-managed forests. All Millbrook Bed's divans are constructed using timber from FSC®-certified forests. This international, non-governmental organisation is dedicated to promoting responsible management of the world's forests.

Lie back and relax, reassured that in this 'throw away' world we live in, a Millbrook mattress has been lovingly hand made to last 10 years or more.

NATURAL, COMFORTABLE & COOL THE BENEFITS OF WOOL

NATURAL COOLING

Wool is a natural fibre and unlike its synthetic counterparts, it is extremely breathable, helping you to keep cool and comfortable.

HEAT REGULATION

Wool is a natural fibre and unlike its synthetic counterparts, it is extremely breathable, helping you to keep cool and comfortable.

HUMIDITY CONTROL

Wool helps dissipate the natural humidity that your body produces, helping keep you warm and comfortable without overheating.

HYPO-ALLERGENIC

Wool offers a dry environment to dust mites – the exact opposite of what they like. It is also highly effective at repelling fungal spores.

SUSTAINABILITY

Wool is 100% natural, renewable and biodegradable and does not contribute to micro plastic pollution in terrestrial or marine environments.

SLEEP QUALITY

Wool helps you to stay in stage 4 sleep (also known as “deep sleep”) for longer, helping you to wake feeling refreshed and ready to go.

..... THE EXPERTS IN SLEEP

COOL, COMFORTABLE & CHEMICAL FREE THE BENEFITS OF COTTON

SOFT TOUCH

Cotton is widely regarded as an excellent choice when it comes to comfort. It is naturally soft, smooth and feels amazing to the touch.

CUSHIONING

Cotton mattresses are beautifully soft. They provide a good cushioning effect which helps provide a comfortable and uninterrupted sleep.

NATURAL WICKING

Cotton has a natural wicking property which absorbs the sweat of the sleeper. This helps to keep the skin dry and provide a cool and comfortable sleep.

DURABILITY

Cotton is a highly durable material that can provide a lifetime of quality sleep by helping to reduce sagging and extending the usable lifespan of the mattress.

SUSTAINABILITY

Cotton is sustainable, renewable, and biodegradable, making it an excellent choice as an environmentally-friendly fiber. All the cotton we use is grown sustainably in the USA.

CHEMICAL FREE

Our complete range is chemical-free, offering 100% natural sleeping surfaces - no chemicals are used in the cotton covers or in any of the natural fillings of our mattresses.
